# Mahmoud Khairy

**Quality Engineering & Test Automation Leader | AI Enablement & LLM Evaluation | AI Product Manager**

Riyadh, Saudi Arabia | +966 54 475 9912 (KSA) | +20 112 006 4763 (Egypt) | mmahmoudkhairy92@gmail.com

LinkedIn: linkedin.com/in/mahmoud-khairy-64633188 | Portfolio: mahmoudkhairy92.github.io/profile/

## Professional Summary

Quality engineering leader with 10+ years in software testing and test automation, progressing at THIQAH from Senior Quality Control Engineer to Lead and Staff Automation Engineer, and now AI Product Manager. Directly led a 5-engineer automation team and shaped automation strategy, tool and framework selection, and technical standards, including CI/CD-integrated execution, with technical influence across a ~70-engineer Quality organization. Built an internal AI-powered QA platform adopted by 5 teams (~20 QC engineers) that improved testing efficiency by 40%. Now applies this quality foundation to LLM evaluation and requirements for AI-powered customer service solutions. ISTQB Advanced Level Test Manager; Employee of the Year 2024 (THIQAH Quality Team).

## Core Competencies

Quality Engineering Strategy · Test Strategy & Test Management · Test Automation Frameworks · CI/CD & Scheduled Test Execution · Technical Leadership & Mentoring · Tool & Vendor Evaluation (Build vs Buy) · Regression, API, Mobile & Performance Testing · Quality Metrics & Dashboards · AI-Enabled Testing · LLM Evaluation · Requirements & Solution Design · Agile / Scrum

## Technical Skills

- **Test Automation:** Selenium WebDriver, Playwright, Robot Framework, Cypress, Appium, Applitools, Katalon Studio, Testim, BrowserStack
- **API & Performance Testing:** Postman, SoapUI, Swagger, JMeter, LoadRunner
- **CI/CD & Test Management:** Azure DevOps, Azure Pipelines, TFS/MTM, JIRA, Git, Docker, Linux
- **AI in Testing & GenAI:** Self-healing scripts, AI locators, predictive test selection, prompt engineering, AI agents, agentic workflows, RAG, Flowise, n8n, OpenAI GPT, Custom GPTs
- **AI-Assisted Development:** Claude Code, Cursor, GitHub Copilot
- **Languages & Data:** Python, Java, SQL, SQL Server, MySQL, MongoDB, Power BI, Metabase
- **Hands-on exploration:** DeepEval, Ragas, Promptfoo, LangSmith, CrewAI, LangChain

## Professional Experience

**THIQAH Business Services** | Riyadh, Saudi Arabia

***AI Product Manager*** **Jun 2026 – Present**

- **AI Customer Service:** Own business requirements and solution design for AI-powered customer service (call center) solutions, working with engineering, data and business teams through delivery.
- **LLM Evaluation:** Designed and executed structured evaluation of customer-service AI across correctness, relevance, task completion, hallucination, safety, prompt-injection resistance, privacy/PII handling, multilingual comprehension, and conversational robustness, using repeatable test scenarios and human review to support vendor acceptance and production-readiness decisions.
- **Procurement Platform:** Built and validated key capabilities for an AI-assisted procurement platform, combining hands-on AI-assisted development with testing and quality ownership, and translating business needs into clear requirements and prioritized backlogs.
- **Agentic AI:** Built and prototyped AI agents and agentic workflows, designed prompt strategies, and validated solution concepts using AI-assisted development tools.

***Staff Automation Engineer*** **Jan 2024 – Jun 2026**

- **Technical Leadership:** Shaped automation strategy, planning, prioritization, tool and framework selection, and technical standards, including mandatory CI/CD pipeline integration and scheduled execution, with technical influence across a Quality organization of ~70 engineers (seniors, leads and technical leads).
- **Test Governance:** Led test strategy and planning across multiple projects, including estimation, risk-based testing, defect triage, release-readiness assessment, CI/CD quality gates, and stakeholder reporting to support go/no-go decisions.
- **Tooling & Vendor Evaluation:** Contributed to technical evaluations of enterprise and AI-driven testing platforms (e.g., Katalon, Testim, mabl, BrowserStack) to inform tooling strategy and build-vs-buy decisions.
- **AI Quality Platform:** Built an internal THIQAH AI-powered QA platform integrated with Azure DevOps and GPT-based workflows; adopted by 5 teams (~20 QC engineers), improving testing efficiency by 40%.
- **AI-Enabled Testing:** Introduced self-healing scripts, AI locators and predictive test selection, and built 5 custom GPT assistants for QA engineers covering test design and SQL/Python automation support.
- **Quality Analytics:** Built Power BI and Metabase dashboards tracking automation coverage, defect rates, execution speed and ROI to support leadership decisions.
- **Engineering Enablement:** Launched Test League (gamified learning program) and QC Tube (knowledge hub) for the Quality organization, later expanded to Development teams, to accelerate automation and AI adoption.

***Lead Automation Testing Engineer*** **Sep 2022 – Jan 2024**

- **Team Leadership:** Directly led a 5-engineer automation team, owning planning, prioritization, technical standards and hands-on mentoring.
- **Frameworks:** Designed and evolved web and mobile automation frameworks (Robot Framework, Playwright, Cypress, Appium), reducing test cycle time by 30% across 10+ projects.
- **Regression Automation:** Scaled the automated regression suite to 2,000+ tests with 95% functional coverage, running through CI/CD pipelines with scheduled execution.

***Senior Quality Control Engineer*** **Apr 2019 – Sep 2022**

- Owned test design and performance testing for 15+ government projects, reducing post-release defects by 30%.
- Introduced Agile QA practices and managed test cases and defects in TFS/MTM for end-to-end traceability.

**Algorithmz** | Cairo, Egypt

***Senior Software Testing Engineer*** **Mar 2018 – Apr 2019**

- Tested web, Android, iOS and Smart TV applications, including API and performance testing.

**Path Solutions** | Cairo, Egypt

***Software Testing Engineer II*** **Feb 2017 – Mar 2018**

- Designed and executed 1,500+ manual and automated test scripts for financial systems, including SQL-based database validation, across 5+ concurrent projects.

**SiliconExpert Technologies** | Cairo, Egypt

***Software Testing Engineer*** **May 2016 – Feb 2017**

- Designed testing procedures and validated 500+ database entries.

## Ventures & Independent Projects

**Quad Insight** | Cairo, Egypt (Remote, Part-time)

***Co-owner & Product Manager*** **Jan 2024 – Present**

- Lead the Quad Insight team behind VetICare (B2B veterinary clinic SaaS) and Squeak (pet-owner mobile app).
- Led mobile quality validation for Squeak across multiple production builds through App Store release.

**QCVerse** | Personal Project

***Founder & Product Owner*** **May 2026 – Present**

- A personal AI-powered Quality Engineering and Test Automation platform for test generation, coverage analysis, automation workflows and Azure DevOps integration, built with the QCVerse Team.

## Awards & Recognition

- Employee of the Year 2024 — THIQAH Quality Team
- 2nd Place — Elm Hackathon (Dec 2025), team Agent X
- Co-organizer — THIQAH Hackathon (Nov 2025), supporting 10+ cross-functional teams on AI solutions

## Certifications & Training

- ISTQB Advanced Level – Test Manager — iSQI (Jan 2025)
- Testim Specialist — Tricentis (Jan 2023)
- Microsoft Certified: Azure Administrator Associate — Microsoft (Oct 2023; expired Oct 2024)
- ISTQB Foundation Level — Egyptian Software Testing Board (ESTB) (May 2018)
- **Selected Training:** Full Stack AI (2023); ChatGPT Impact on STLC (2023); AI/ML Impact on Software Testing Life Cycle (2022); Strategic Planning & Performance Management (2024)

## Education

***Faculty of Electronic Engineering — Bachelor's Degree, Computer Science*** **2014**
Menoufia University, Egypt

## Languages

Arabic: Native | English: Professional working proficiency
